SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

NOTICES & AMENDMENTS BY LINE OF ROUTE CODE**NW1001 ARMITAGE JN (INCL.) TO PRESTON FYLDE JN****PRESTON SOUTH JN****FROM THURSDAY 5 MAY 2022 UNTIL FURTHER NOTICE**

The route indication associated with the route from signal PN97 to signal PN127 will be disconnected. This indication normally displays a “3” for Platform 3 at Preston station. **No route indication will be displayed for this route only.**

Signal PN97 is a gantry-mounted signal located on the Down Fast line, applicable to Down-direction trains entering Preston station. The route from it to signal PN127 at the north end of Preston station Platform 3 is the ‘straight ahead’ route.

All other route indications associated with signal PN97 will remain operational.

The disconnection is required due to repeat intermittent failures of the “3” indication for the route from signal PN97 to signal PN127. This indication will be disconnected until a replacement unit can be provided.

(D19293) (05/05/2022) (52R)

NW3001 CREWE NORTH JUNCTION TO HOLYHEAD**LLANDUDNO JUNCTION****FROM SUNDAY 11 DECEMBER 2022 UNTIL FURTHER NOTICE****Stabling of Units at Wrexham General and Llandudno Junction due to introduction of new TfW rolling stock**

Units will be stabled at the following locations from 11th December until further notice in order to support Transport for Wales introduction of new rolling stock.

When stabling at these locations, both the signaller and driver need to have been issued with a brief associated to the activity.

Wrexham General**Llandudno Junction**

The number of units stabled at each location is restricted to the length of platform available. All units will be stabled within the platform limits and in the rear of the platform starting signal, where present.

(D19963) (24/12/2022) (UFN)

NW3005 GOBOWEN (EXCL) TO SALTNEY JUNCTION**WREXHAM GENERAL****FROM SUNDAY 11 DECEMBER 2022 UNTIL FURTHER NOTICE****Stabling of Units at Wrexham General and Llandudno Junction due to introduction of new TfW rolling stock**

Units will be stabled at the following locations from 11th December until further notice in order to support Transport for Wales introduction of new rolling stock.

When stabling at these locations, both the signaller and driver need to have been issued with a brief associated to the activity.

Wrexham General**Llandudno Junction**

The number of units stabled at each location is restricted to the length of platform available. All units will be stabled within the platform limits and in the rear of the platform starting signal, where present.

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NETWORK RAIL WESTERN ROUTE SECTIONAL APPENDIX DATED APRIL 2009 – Continued****MODULE WR2 – LOCAL INSTRUCTIONS**

Hard Copy Sectional Appendix: Page 618

Explanation of Change: DELETE local instruction Merehead West to Cranmore (ESR) in full and add the following to hard copy page 618.

ADD the following to the Local instruction shown on hard copy page 618 to read.

GW580 EAST SOMERSET JN TO CRANMORE**Merehead West to Cranmore (ESR)**

The single line between Merehead West and Cranmore (ESR boundary) is worked in accordance with the one-train working regulations (rule book TW1/34) and a train staff is provided.

Handling of the train staff – the train staff (and annetts key for Cranmore East ground frame) is kept in Westbury signal box when not in use. If the driver cannot collect/return the train staff from the signal box, authorised persons may deliver/receive it as shown:

- 1) Westbury station – competent person appointed by the local manager in the signal box,
- 2) Merehead West – freight/train operators' representative (usually the shunter or the guard) or,
- 3) Cranmore – as b) above or the East Somerset Railway (ESR) Person in Charge (PiC)

The Westbury signaller must be told when:

- a) the train staff has been delivered to/received from the driver at any location listed above and,
- b) a down train to the ESR has passed clear of the down stop board (END OF STAFF SECTION) which is located the Mendip Vale side of trap points worked from Cranmore East ground frame (GF).

Cranmore East GF is one lever working trap points (there is no facing point lock). Operation requires both the ESR key and annetts key (which will be locked in the GF when the points have been operated for a train to proceed). Operating instructions are provided at site. The GF must not be operated until the traincrew and ESR PiC reach a clear understanding with each other about what is to be done.

Note: the GF operator must be in possession of the train staff before putting the annetts key in the lock box to release the ground frame.

Arrival at Cranmore (down) – the train must stop at the down stop board (AWAIT INSTRUCTIONS) which is located just the Westbury side of the trap points worked from the GF.

Departure from Cranmore (up) – the Westbury signaller's permission must be obtained before the GF is operated for a train to enter the single line.

Passenger trains may be operated between East Somerset Jn and Cranmore when authorised in the notices.

A competent person (the guard or the shunter) must be appointed to take charge of movements and reach agreement with the ESR PiC about what is to be done.

The competent person must make sure the trap points at Cranmore East GF are closed and secured (facing direction – using a clip and a scotch) for the movement, and that the route to (or from) the required platform line at Cranmore station has been set by the ESR PiC (from Cranmore Station GF).

Explanation of Change: ARCHIVE Cardiff Local Instructions

ARCHIVE the following local instruction shown on hard copy page 680.

GW900 – PILNING TO FISHGUARD HARBOUR**Cardiff**

The following is a list of preferred shunting routed that will be used where more than one route is available.

Where a shunt is not listed, the Driver and Signaller must reach a clear understanding as to the limits of the movement and the signals at which the train will reverse behind.

Location	Shunt details – Cardiff Central Station – all platforms
Cardiff Central (West end)	Route via Line E to signal CF2239 and reverse behind CF7048. (NB: Route NOT electrified. Shunt move available to diesel traction only)
	Route via Line A to limit of Shunt CF7051 and reverse behind CF2342. (Route fully electrified up to Limit of Shunt)
	Route via Line A to the Brickyard Siding and reverse behind CF2344. (Route fully electrified up to buffer stop)
	Note: The above two routes are the only shunt moves available to electric traction. All other routes are provided with only minimal OLE as part of over-run protection, and Are thus not available for use by electric traction.

A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NETWORK RAIL WESTERN ROUTE SECTIONAL APPENDIX DATED APRIL 2009 – Continued****MODULE WR2 – LOCAL INSTRUCTIONS – Continued**

****Hard Copy Sectional Appendix: Page 678**

Explanation of Change: AMENDMENT to Cardiff Central Local Instructions – addition of preferred shunts, Class 80x signage & IET traction balise.

ADD the following to the local instruction shown on hard copy page 678 to read.

GW900 – PILNING TO FISHGUARD HARBOUR

Cardiff Central / Caerdydd Canolog.

Preferred shunts

The following is a list of preferred shunting routed that will be used where more than one route is available.

Where a shunt is not listed, the Driver and Signaller must reach a clear understanding as to the limits of the movement and the signals at which the train will reverse behind.

Location	Shunt details – Cardiff Central Station – all platforms
Cardiff Central (West end)	Route via Line E to signal CF2239 and reverse behind CF7048. (NB: Route NOT electrified. Shunt move available to diesel traction only)
	Route via Line A to limit of Shunt CF7051 and reverse behind CF2342. (Route fully electrified up to Limit of Shunt)
	Route via Line A to the Brickyard Siding and reverse behind CF2344. (Route fully electrified up to buffer stop)
	Note: The above two routes are the only shunt moves available to electric traction. All other routes are provided with only minimal OLE as part of over-run protection and are thus not available for use by electric traction.

Signage for Class 80x trains

Signage is provided and is applicable to class 80x IET's only. New "Lower pantograph" signage with an additional sign stating Electric Trains No Access Except Line A is provided at the west end of the station at the following locations

Platform Loop (Platform 0 (zero))

between platforms 1 and 2 (Lines A and B)

between Lines C and D

at the end of platform 3 (Line E)

at the end of platform 4, on the right hand side of the line

IET traction balise arrangements, Cardiff Station (west end) signal CF2721

Please note that the IET traction balise (also known as a 'zero' or 'kill' balise) provided on the approach to CF2721 signal on platform 0 at Cardiff has no data associated to it due to technical limitations with the group of balises at the west end of Cardiff station.

Therefore, an IET unit passing over this particular balise in the down direction will cause a 'missed balise alarm' to be activated in the driving cab of the unit which the driver will need to acknowledge and report, (no requirement do so until a more convenient point, i.e. arrival at destination) regardless of which traction mode the unit is in.

There is no requirement to caution subsequent trains following a report of a missed balise alarm at this signal, but the incident must be reported to the Route Control for a fault number to be raised to ensure technical follow up.

Dated: 28/06/2025
(D22764) (28/06/2025) (17)

****Hard Copy Sectional Appendix: Page 679**

Explanation of Change: NEW Cardiff West Brickyard Sidings Local Instruction

ADD the following new local instruction to be shown on hard copy page 679, above GW900 Pilning to Fishguard Harbour Canton Depot

GW900 – PILNING TO FISHGUARD HARBOUR

Cardiff West Brickyard Sidings

Cardiff West Brickyard Siding.

Drivers of the first arriving train must position their train 2 metres from the stop blocks at the Swansea end of the siding so as to permit any further arriving trains to reverse behind signal CF2344.

Drivers of trains departing towards Cardiff Central must contact the signaller for permission to make any movement towards signal CF2344 at danger. Drivers must contact the signaller when ready to leave, however if signal CF2344 has been cleared, drivers may proceed towards the station.

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NOTICES & AMENDMENTS BY LINE OF ROUTE CODE****GW105 UFFINGTON TO FORDGATE (VIA BOX)****BRISTOL TEMPLE MEADS*******PLEASE NOTE THAT THIS ITEM NOW APPLIES “UNTIL FURTHER NOTICE” *****

In association with the refurbishment of the roof at Bristol Temple Meads, the Motorail siding (adjacent to platform 2) This has been shortened by 95 metres, which will leave an operational length of 90 metres.
The temporary length will be in place for the duration of the works, to allow staff a safe walking route to and from the station.
A standard buffer stop with no light, will be provided to protect the shortened Motorail siding.

This is in connection with Short Term Network Change ref STNC/G1/2019/WEST/669.

This was previously published in Western & Wales WON Week 52 (19/20)

(D17515) (05/12/2020) (UFN)

**BRISTOL TEMPLE MEADS
STATION ROOF REFURBISHMENT*******PLEASE NOTE THAT THIS ITEM NOW APPLIES “UNTIL FURTHER NOTICE”*****

Scaffolding (for refurbishment of the station roof) will be erected the length of the structure above Bristol Temple Meads platform lines 1, 3 to 6 and the Up Through line.

Drivers and others concerned to note.

See also section C of this notice (new banner repeating signal BL2131 BR).

JUNCTION****SHREWSBURY AREA****WITH IMMEDIATE EFFECT AND UNTIL FURTHER NOTICE**

Due to faded signage in the Shrewsbury area can drivers not use the SG facility to contact Signallers within ½ a mile of Shrewsbury Station.

This instruction will apply until further notice.

(D21333) (09/03/2024) (UFN)

**BETWEEN PONTRILAS AND ABERGAVENNY
UNTIL FURTHER NOTICE****Rule Book Module SP Section 3 – Temporary Speed Restriction (TSR)**

Trial introducing a new sign similar in its appearance and specification to the existing ‘T’ indicator but bearing the letter ‘A’ meaning ‘accelerate’ located underneath the ‘T’ indicator for the temporary speed restriction.

During the trial the Driver will be able to accelerate when the front of the train reaches the ‘A’ and ‘T’ indicators. Where the ‘A’ indicator is not visible the Driver will comply with Rule Book module SP and accelerate when the rear of the train passes the ‘T’ indicator.

During the trial the ‘A’ indicator may be removed and the trial suspended if:

- R1 an ESR is imposed over the same section of line,
- R2 where there is a consecutive TSR after the trial location or
- R3 where a complex TSR is introduced.

The trial involves Transport for Wales, Great Western, DB Cargo, Freightliner, GB Railfreight Colas Rail Direct Rail, Services and Rail Ops Group services only and will be for the following level crossing:

Offa’s Dyke footpath crossing, HNL 17m 24ch to 17m 12ch

Last updated: 23/06/2025
Explanation of change: Signal PN403 has been added to the table.

(D22826) (23/06/2025) (RSSB) (UFN)

USE OF GSM-R TO ADVISE DRIVERS OF AN APPROACHING
TSR DUE TO A HIGH OUPUT WORKSITE ON THE ADJACENT LINE - (THIS NOTICE
APPLIES TO THE LNW(N) & LNW(S) ROUTES ONLY)

GSM-R berth triggered messages will be used to pass information to Drivers where TSRs are used when the adjacent line is a live worksite.
TSR boards will be used with the berth triggered broadcast acting as a supplementary message only.

(D14255) (30/06/2018) (43R)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

MISCELLANEOUS INSTRUCTIONS – Continued**OLE ISSUES IN THE PRESTON AREA****NW1001 ARMITAGE JN (INCL) TO PRESTON FYLDE JN****WEED SPRAYING TRAINS ARE IN OPERATION**

In 2025 multi-purpose vehicles (MPVs) and Envu (previously Bayer) trains will be delivering the national train-borne weed spray programme.

If any staff are on or near the line when a Weed Control Train approaches, they should take the following action:

- On the approach of the Weed Control Train staff must acknowledge and move to a position of safety
- Remain in the position of safety; **Make themselves visible** to the Weed Control Train. If the spray operators can see anyone who is working in the vicinity, they will suspend spraying as they pass the site.
- Staff should not 'hide' behind bushes in an attempt to avoid being sprayed. In such cases the spray operators may not see staff and the spray jets are specifically designed to penetrate bushes.

The herbicides deployed by the Weed Control Train are biodegradable, non-irritant and non-harmful at the low concentrations used. In the unlikely event that staff are sprayed accidentally it is recommended that they take the following actions:

- If the eyes have been sprayed, rinse immediately with clean, water for 15 minutes and obtain medical aid if any discomfort is felt thereafter.
- Rinse any exposed skin with clean water and wash with soap and water afterwards.
- Avoid eating, drinking, or smoking until this procedure has been carried out.
- Change any sprayed clothing at the earliest convenient time and retain in a plastic bag for collection.
- Report the incident to the Route Operations Control.
- Should any member of staff be sprayed they may obtain advice from SCO 24:7 Seasonal Controller 01908 723500 (Option 8)
- If you have any medical concerns, please call the non-emergency NHS number – 111.

Should any member of staff require any further information or advice please contact:

SCO 24:7 Seasonal Controller 01908 723500 (Option 8)

(D22409) (22/03/2025) (22)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned

MISCELLANEOUS INSTRUCTIONS – Continued**DISCONNECTION NOTICE**

DISCONNECTION SUMMARY			
Start date	Saturday 12 th April 2025	Start time	08:00
Finish date	Friday 1 st August 2025	Finish time	08:00
Site contacts	Colin Platt	Phone numbers	07771832110
Location	LNW NW&C		
ELR and Mileage	N/A		
LOR (Line Of Route) to include Description	N/A		
Purpose of disconnection / Nature of work to be carried out	<p>The software in the Network Rail DICORA terminals (GSM-R terminals) is being updated to allow the core FTS equipment to undergo a technology refresh. The software update process includes an update of the BIOS on the DICORA terminals. Both the BIOS update and the DICORA software update are included on a Compact Flash (CF) card, which must be installed in each terminal</p> <p>All works will be completed with relevant Signaller permission and at an agreed specific time.</p> <p>This activity will require the each Dicora listed below to reboot, therefore being offline for 15 minutes. During this time the role will be taken over by adjacent Signal Box to ensure no loss of communication.</p>

WON DISCONNECTION SUMMARY			
Start date	23/07/25	Start time	01:00
Finish date	23/07/25	Finish time	04:30
Site contacts	Richard Glover	Phone numbers	+447515620231
Location	NATIONAL		
Purpose of disconnection / Nature of work to be carried out	Frequentis Fixed Terminal Sub-system - Execute WDR on DICORA Terminal connections Switching the ISDN connections of DICORA terminals from Stoke to Didcot FTS Core Node will affect the signaller's terminal for a 5 minute period, during a white period.		
For a period of up to 5 minutes, the functionality of the signaller's terminal will be impacted as follows:			
<ul style="list-style-type: none">• loss of connection to the FTS Core – shown as a connection lost indication on the terminal• no role change or role login• not able to make or receive REC calls• not able to make or receive voice calls, including transfer of calls• not able to send or receive OPS messages• no train list updates• no IVR record or playback• no sending or receiving SMS text messages			
Railway Emergency Calls can still be initiated by drivers, but the signaller will not receive the call. Prior to the outage a check will be carried out to confirm no REC calls are ongoing. If a REC call is ongoing, the upgrade works will commence on completion of the REC.			
The outage will affect signal boxes and control centres nationally. The outage is scheduled to occur during the following periods:

RULE BOOK MODULE T3 .10

PROTECTION ZONES

PROTECTION ZONES (RULE BOOK MODULE T3.10)

Increased use of Protection Zones is being made by the Western and Wales Routes to deliver OTM activity and published to apply at various locations on the route in accordance with Rule Book Module T3 Section 10.

Additionally, until 31st December 2026, the use of the following forms of additional protection is authorised on a trial basis:

- R1 Block indicator placed to Train On Line (AB)
- R2 Token

DISCONNECTION SUMMARY			
Start date	Saturday 12 th April 2025	Start time	08:00
Finish date	Friday 1 st August 2025	Finish time	08:00
Site contacts	Colin Platt	Phone numbers	07771832110
Location	Western Route		
ELR and Mileage	N/A		
N :B Mileage and chains for England and wales routes and Mileage and Yards for Scotland Route			
LOR (Line Of Route) to include Description	N/A		
Purpose of disconnection / Nature of work to be carried out	<p>The software in the Network Rail DICORA terminals (GSM-R terminals) is being updated to allow the core FTS equipment to undergo a technology refresh. The software update process includes an update of the BIOS on the DICORA terminals. Both the BIOS update and the DICORA software update are included on a Compact Flash (CF) card, which must be installed in each terminal</p> <p>All works will be completed with relevant Signaller permission and at an agreed specific time.</p> <p>This activity will require the each Dicora listed below to reboot, therefore being offline for 15 minutes. During this time the role will be taken over by adjacent Signal Box to ensure no loss of communication.</p>

WON DISCONNECTION SUMMARY			
Start date	23/07/25	Start time	01:00
Finish date	23/07/25	Finish time	04:30
Site contacts	Richard Glover	Phone numbers	+447515620231
Location	NATIONAL		
Purpose of disconnection / Nature of work to be carried out	Frequentis Fixed Terminal Sub-system - Execute WDR on DICORA Terminal connections Switching the ISDN connections of DICORA terminals from Stoke to Didcot FTS Core Node will affect the signaller's terminal for a 5 minute period, during a white period.		
For a period of up to 5 minutes, the functionality of the signaller's terminal will be impacted as follows: <ul style="list-style-type: none">• loss of connection to the FTS Core – shown as a connection lost indication on the terminal• no role change or role login• not able to make or receive REC calls• not able to make or receive voice calls, including transfer of calls• not able to send or receive OPS messages• no train list updates• no IVR record or playback• no sending or receiving SMS text messages			
Railway Emergency Calls can still be initiated by drivers, but the signaller will not receive the call. Prior to the outage a check will be carried out to confirm no REC calls are ongoing. If a REC call is ongoing, the upgrade works will commence on completion of the REC.			
The outage will affect signal boxes and control centres nationally. The outage is scheduled to occur during the following periods:			
Period 1: 01:00 - 02:30
